SUBJECT INDEX

Antimony trioxide flame retardants
Mass spectrometric studies of the reactivity of antimony trioxide with halogenated flame retardants in the pyrolysis of plastics 313
Atomic silicon ions
Chemistry initiated by atomic silicon ions in the gas phase: formation of silicon-bearing ions and molecules 719

Benzonitrile *N*-sulfide
Identification of the transient benzonitrile *N*-sulfide by flash-vacuum pyrolysis and neutralization–reionization mass spectrometry 477

$C_2H_2^{+\cdot}$
Proton transfer reactions of $C_2H_2^{+\cdot}$: the bond energy $D_0(C_2H–H)$ 679
$C_3H_2^{+\cdot}$
The heats of formation of cyclic and linear $C_3H_2^{+\cdot}$ 693
$CH_2–CH_2–O–CH_2^+$
Unimolecular and bimolecular reactions of the β-distonic ion $CH_2–CH_2–O–CH_2^+$ and its deuterated derivatives 545
CH_3NH_2
The association reactions of Pb^+ ion with CH_3OH and CH_3NH_2 in the gas phase 665
CH_3OH
The association reactions of Pb^+ ion with CH_3OH and CH_3NH_2 in the gas phase 665
$[CH_3OH\ CH_2=CH2^{+\cdot}]$
Energy dependence of H-exchange versus C–C bond formation in the complex $[CH_3OH\ CH_2=CH_2^{+\cdot}]$: unimolecular and bimolecular studies 579
Charge separation mass spectrometry
New developments in charge separation mass spectrometry 489
Co^+
Detection and characterization of competitive processes giving rise to isomeric products in the reactions of Fe^+, Co^+ and Ni^+ with *n*-butyl cyanide 803
Collision-induced decomposition
Collision-induced decomposition of ions 105

Disaccharides
Determination of interglycosidic linkages in disaccharides by high performance tandem mass spectrometry 301
Dynamics of high mass ions
A scaling technique for studying the dynamics of high mass ions in Fourier transform mass spectrometry: a preliminary report 381

Electron capture
Electron capture induced processes in molecules and molecular aggregates 753
Electron impact ionization
Electron impact ionization cross sections of molecules. Part I. Experimental determination of partial ionization cross sections of SF_6: a case study 143
Electron impact ionization cross sections of molecules. Part II. Theoretical determination of total (counting) ionization cross sections of molecules: a new approach 157

Fe^+
Detection and characterization of competitive processes giving rise to isomeric products in the reactions of Fe^+, Co^+ and Ni^+ with *n*-butyl cyanide 803

$H_2NCOOCH^{3+}$
The gas phase chemistry of the methyl carbamate radical cation $H_2NCOOCH_3^+$: isomerization into distonic ions, hydrogen-bridged radical cations and ion–dipole complexes 521

Intramolecular nucleophilic displacement reactions
Collisional activation of intramolecular nucleophilic displacement reactions: the formation of acetolactone from dissociation of α-haloacetate negative ions 785
Ion trajectories
Laboratory-frame and rotating-frame ion trajectories in ion cyclotron resonance mass spectrometry 323

Ion traps
Theory of ion cyclotron resonance mass spectrometry: Resonant excitation and radial ejection in orthorhombic and cylindrical ion traps 347
Ion/molecule clustering reactions
Low pressure ion/molecule clustering reactions towards cationic dimers 611
Ionic clustering data
Evaporative corrections to high-pressure ionic clustering data 457
Isomeric methyl ethyl esters
Intramolecular hydrogen-deuterium exchange in isomeric methyl ethyl esters of phenyl-maleic, -fumaric, and -succinic acids under chemical ionization: low energy CID study and geometrical requirements of the exchange 565

Low pressure association reactions
Determination of rate constants for low pressure association reactions by Fourier transform-ion cyclotron resonance spectrometry 701

Magnetic sector
High performance mass spectrometers of magnetic sector type 31
Mass spectrometer design
How far the computer can be avoided in mass spectrometer design 15
Mass spectrometry
Some reflections on the early days of mass spectrometry at the University of Minnesota 1
Metal-vapor vacuum arc
Metal-vapor vacuum arc as a primary ion source for secondary ion mass spectrometry 51
Monogermane–hydrocarbon mixtures
Gas phase ion/molecule reactions in monogermane–hydrocarbon mixtures: a comparative Fourier transform mass spectrometry and chemical ionization mass spectrometry study 647
Multiphoton electron detachment
Infrared spectra of butenyl anions: multiphoton electron detachment as a photochemical probe of isomeric structures of gas phase anions 445
Multireference-configuration interaction (MR-CI)
Multireference-configuration interaction (MR-CI) calculations on HS^{2+} and experimental observation via electron impact ionization of H_2S 505

$N^{2+}(He,He^+)N^+$
Beam scattering study of the charge transfer process $N^{2+}(He,He^+)N^+$ at low collision energies 197
Negative ion formation
Negative ion formation by field ionization—studied by field ion microscopy and appearance energy measurements 93
Neutralization–reionization
On the use of distorted Franck–Condon factors in the interpretation of neutralization–reionization experiments 465
Detection and characterization of competitive processes giving rise to isomeric products in the reactions of Fe^+, Co^+ and Ni^+ with *n*-butyl cyanide 803
Nucleosides and nucleotides
Applications of multiphoton ionization mass spectrometry: small protected nucleosides and nucleotides 267

Pb^+
The association reactions of Pb^+ ion with CH_3OH and CH_3NH_2 in the gas phase 665
Peptides
Microderivatization of peptides by placing a fixed positive charge at the N-terminus to modify high energy collision fragmentation 287
Photofragmentation of toluene
Photofragmentation of toluene in a Fourier transform-mass spectrometer in the visible and infrared range 595
Polyfluoro-benzenes
An energy-resolved study of the fragmentation of protonated polyfluoro- and polychloro-benzenes 133
Polyatomic ion-molecule radiative association
Polyatomic ion–molecule radiative association: theoretical framework and predictions: observations of $NO^+ + C_6H_5CN$ as an example 423
Polyatomic ions
Collisions of polyatomic ions with surfaces 209
Polychloro-benzenes
An energy-resolved study of the fragmentation of protonated polyfluoro- and polychloro-benzenes 133

Radial velocity distributions
Radial velocity distributions of secondary ions ejected in electronic sputtering of organic solids 63

$S^+ + H_2(D_2, HD) \rightarrow SH^+(SD^+) + H(D)$
Translational and electronic energy dependence of $S^+ + H2$ (D_2, HD) $\rightarrow SH^+(SD^+) +$ H(D): spin-allowed and spin-forbidden pathways 177
Selected ion flow tube
A selected ion flow tube study of the reactions of F^+, Cl^+, Br^+ and I^+ with several molecular gases at 300 K 737
Semiconductor cluster ions
Studies of the chemistry of large semiconductor cluster ions 625
Small ionic species
A new instrument for measuring the radiative lifetimes and for studying the state-selected bimolecular reaction chemistry of small ionic species 397
Source–analyser coupling
Source–analyser coupling in the quadrupole mass filter 41

Time-dependent behaviour
Application of the time-of-flight mass spectrometer to monitor time-dependent behaviour following pulsed laser heating of solids 77
